-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 6) ☐ Other: _____.

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because:

- The first line is redundant; applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "the," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. The language should be clear and concise and should not repeat information given in the title. **It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.**

Correction is required. See MPEP § 608.01(b).

2. The disclosure is objected to because of the following informalities:

- On page5, line 31 should read - - 8a - -, instead of "8".

Appropriate correction is required.

Drawings

3. The drawings are objected to because:

- In figure 2, reference character "21a" should be - - 210a - -.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claim 22 is objected to because of the following informalities:

- The phrase ", in particular a motor vehicle bodywork part," should be deleted in order to avoid 35 USC 112 issues.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 – 15, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Takabatake (EP 0 730 999 A1).

With respect to claim 1, Takabatake teaches a sound insulation assembly for mounting in a part presenting a longitudinal direction and a tubular wall (Fig.1), the assembly comprising a piece of material (Fig.1, Item 21) that is thermally expandable to form a foam, suitable for filling the through section of the part (Fig.1, Item 1); and a support (Fig.1, Item 10) comprising retaining means (Fig.1, Items 11) for retaining the piece of expandable material prior to expansion; and fixing means (Fig.1, Item 15) for fixing to a first wall portion of the part and coupled to the retaining means; wherein the piece of expandable material is shaped in the form of a wafer presenting two parallel main faces and extending essentially in a main plane away from the first wall portion towards the diametrically opposite wall portion, and wherein the support allows the wafer to expand in all directions (Figs.1, 2 and 4; page 3, line 38 – page 4, line 4 and page 4, line 40 – page 5, line 7).

Art Unit: 2837

With respect to claims 2 – 15, 21 and 22, the Examiner considers that Takabatake teaches the limitations described in the claims (Figs.1 – 9(B); page 3, line 38 – page 4, line 4, page 4, lines 32 – 33 and page 4, line 40 – page 6, line 27).

Allowable Subject Matter

6. Claims 16 – 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The attached hereto PTO Form 892 lists prior art made of record that the Examiner considered it pertinent to applicant's disclosure.

Contact Information

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edgardo San Martin whose telephone number is (571) 272-2074. The examiner can normally be reached on 8:00AM - 5:00PM.
